NEMO[®] Beverage Pumps Smooth Conveyance at universal Use

The heart of your process. ■

NEMO® Beverage Pumps

Features and Product Programme Overview

Universal Use

The strength of the new NEMO® Beverage Pump is the universal use in wine-growing, wine production, sweet must production, breweries, distilleries and in beverage production.

Wide Range of Applications

The pumps are specifically used for products with the following characteristics:

- Low to high viscosity
- Shear-sensitive
- High solids content (such as fruit pulp and stone fruit) and free of solids

Large Range of Capacities and Pressures

- Capacities from 500 up to 32000 l/h
- Differential pressure of 0 up to 4 (6) bar

Advantages

- Smooth and reliable conveyance due to low pump speed
- Infinitely variable flow rate by integrated speed control in the drive by a frequency inverter
- Portable and mobile version provides flexibility
- Variable, modular design
- Contact parts completely in CrNiMo steel
- Stator in food quality (BfR)
- Connections according to DIN 11851 – a variety of other local connections available
- High suction capability
- Service-friendly

These advantages guarantee a smooth and reliable conveyance of fluids such as mash, raw products, concentrates, fruit and vegetable juices, nectar, sugar solution, syrup, whole grapes, must, sludge, yeast and wine.

NEMO® Beverage Pump NM021

- Portable version
- Capacities from 500 up to 5000 l/h
- Frequency .75 kW
- Connections DN32

NEMO® Beverage Pump NM031

- Mobile version
- Capacities from 1500 up to 13000 l/h
- Frequency 2.2 kW
- Connections DN50

NEMO® Beverage Pump NM041

- Mobile version
- Capacities from 3000 up to 13000 l/h
- Frequency 3.0 kW
- Connections DN65

NEMO® Beverage Pump NM051

- Mobile version
- Capacities from 10000 up to 32000 l/h
- Frequency 5.5 kW
- Connections DN80
